## I. Statement of Reasons for Allowance:

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-12, the prior art cited herein fails to disclose a tire air pressure monitoring system/method in a tire comprising a control circuitry for determining whether air pressure in the tire is increasing or decreasing with respect to time and determining whether a ratio of the air pressure and air temperature in the tire is increasing, decreasing or remaining constant with respect to time to infer that the tire is moving, motion of the tire being determined without directly sensing acceleration or movement of the tire and a power management circuitry for selectively powering the pressure sensor and temperature sensor at measurement intervals which are shorter when the control circuitry has inferred that the tire is moving than when the tire is not moving.

Regarding claims 13-20, the prior art cited herein fails to disclose an air pressure monitoring system for a tire comprising a control circuit having a first input for receiving a value representative of air pressure in the tire and a second input for receiving a value representative of air temperature in the tire, the control circuit determining whether the air pressure is increasing or decreasing with respect to time and determining whether a ratio of the air pressure and air temperature is increasing, decreasing or remaining constant with respect to time to infer that the tire is moving, motion of the tire being determined without directly sensing acceleration or movement of the tire and a power management circuitry coupled to the control circuit for selectively providing power at

Application/Control Number: 10/533,271

measurement intervals which are shorter when the control circuit has inferred that the tire is moving than when the tire is not moving.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## **II. Examiner's Amendment:**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CAR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

## **Examiner's Amendment**

## In the claims:

In claim 13, lines 16-17, the phrase "the control circuitry" has been changed to -- the control circuit --.

In claim 14, line 2, the phrase "the control circuitry" has been changed to -- the control circuit --.

In claim 14, line 3, the phrase "the control circuitry" has been changed to -- the control circuit --.

Application/Control Number: 10/533,271

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anh V. La whose telephone number is (571) 272-2970. The examiner can normally be reached on Mon-Fri from 9:30am to 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Wu can be reached on (571) 272-2964. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
